

NOTES

1. Verifying Dimensions.
The contractor shall verify dimensions against such other drawings or site conditions as pertain to this part of the work.
2. Existing Services.
Any information concerning the location of existing services indicated on this drawing is intended for general guidance only. It shall be the responsibility of the contractor to determine and verify the exact horizontal and vertical alignment of all cables, pipes, etc. (both underground and overhead) before work commences.
3. Issue of Drawings.
Hard copies, dwf and pdf will form a controlled issue of the drawing. All other formats (dwg, dxf etc.) are deemed to be an uncontrolled issue and any work carried out based on these files is at the recipient's own risk. RPS will not accept any responsibility for any errors arising from the use of these files, either by human error by the recipient, listing of un-dimensioned measurements, compatibility issues with the recipient's software, and any errors arising when these files are used to aid the recipient's drawing production, or setting out on site.

Proposed Drainage Kerb	
Proposed Gully	
Relocated Gully	
Proposed Storm Chamber	
Proposed ACO Access Chamber	
Proposed Hydrobrake Flow Control	
Proposed Petrol Interceptor	
Proposed Building Down Pipe	
Proposed Filter Drain Chamber	

Existing Services
The proposed designs have been developed to minimise impact on existing and permitted services/utility infrastructure. Any protection or diversionary works required will be developed and agreed with the relevant public utility companies during detailed design stage
